EXPERIENCE

Freelance

May 2024 – July 2024 (2 months)

Freelance Full Stack Software Engineer

Bangkok, Thailand

- Integrated crypto payment gateway solution (OxaPay) for an online entertainment website
- Developed user authentication and reset password functionalities using SolidJS and ExpressJS

Agoda

August 2023 – April 2024 (8 months)

Software Engineer Intern (Backend)

Bangkok, Thailand

- Integrated code coverage tool into the GitLab CI pipeline and block any merge with insufficient tests
- Configure the build process in the GitLab CI pipeline
- Streamlined operations by designing and developing a new API endpoint using ASP.NET Core, reducing a multi-day process to few minutes
- Automate email sending system to eliminate the need to manually send email to partners, improving efficiency
- Migrated large .NET Framework legacy application to .NET Core and deployed to Istio service mesh
- Visualized data using SQL in Apache Superset for our stakeholders
- Worked in an Agile environment to enhance efficiency and productivity

EDUCATION

Mahidol University International College

Nakhon Pathom, Thailand

Bachelor of Science in Computer Science, Minor in Japanese

Sep. 2019 – Jul. 2024

PROJECTS

Homelab | *Proxmox, Docker, Portainer, Tailscale*

- Installed and configured Proxmox on a spare computer
- Create and configured Debian VM on Proxmox
- Utilized Portainer to host various web applications and game servers on the VM
- Integrated Tailscale and WireGuard to enable secure remote access to local server and to bypass CGNAT

Novel Reader ([source](#)) | *Python, Flask, Jinja, MySQL*

- Developed a full-stack content management system web application for novel with 2 other people
- Design and implemented the schema for the web app
- Worked on both frontend and backend
- Implemented an account system completes with bookmarks for each user

Rust Chip8 ([source](#)) | *Rust, winit, cpal, pixels*

- Developed an interpreter for Chip-8 programming language
- Used low level crates such as winit and cpal
- Implemented all opcodes according to the original specification
- Utilized multithreading to get accurate CPU cycle timing

IC Shell ([source](#)) | *C*

- Developed a shell program using C
- Utilized parallelism to execute background and foreground jobs
- Implemented most basic features such as redirection, scripting, and etc.
